Model 360°

The Ultimate Fishing Machine

Top Anglers Bet On This Calcutta. For over ten years Calcutta Marine has been researching hull designs, helm, deck and cabin layouts, and talking with recreational and tournament anglers to create a World Class Sport Fishing Catamaran. The Calcutta 263 defined "Fishability" and St Petersburg Times dubbed it "The Ultimate Fishing Machine". With a unique design that features the open transom and Seagate™ the Calcutta 263 immediately caught the eye of anglers at all levels. The Calcutta team has never looked back, constantly staying focused on innovative products while maintaining the unsurpassed reputation that it is known for, and now we are proud to introduce the newest member of our fleet, the Calcutta 360° that features true 360° Fishability. Our attention to detail and desire to build a boat that will also accommodate overnight and weekend fishing trips, and is unlike anything else, transcends into the final product. Calcutta owners from all parts of the sport fishing world enjoy something unique to their own style. Whether it's "dialed in" for tournament fishing or a fishing trip with your family and friends, a semi-custom Calcutta will fulfill your dreams. We Share Your Passion For The Sea!
